

Ensure Cost-Effective Care for Medicaid Beneficiaries

Medicaid programs face unique challenges, but the fundamental goal of providing cost-effective, quality care remains. The only Medicaid-specific solution on the market, MedeAnalytics Medicaid Management offers data insight to identify cost drivers, monitor utilization programs, and evaluate physician performance – while improving collaboration in policy decision-making.

Total cost of care per member per month

With Medicaid Management You Can:

- Manage care for low socioeconomic status, dual-eligible, and chronically ill beneficiaries
- Identify cost drivers and quality of care improvements
- Spot trends and drill down to pinpoint root causes
- Monitor disease and case management programs
- Evaluate performance to identify top-performing providers
- Collaborate with stakeholders from within the MedeAnalytics web-based application

MEDICAID MANAGEMENT

/ WHO IS IT FOR? /

CEOs, CFOs, and CMOs within state Medicaid departments and Medicaid health plans

/ WHAT DOES IT DO? /

Offers data insight to reduce costs, focus interventions, and improve collaboration in Medicaid management

/ WHY DO YOU NEED IT? /

- Identify cost drivers in Medicaid beneficiary care
- Monitor disease and case management programs
- Evaluate provider performance
- Profile beneficiaries, providers, and hospitals
- Improve collaboration

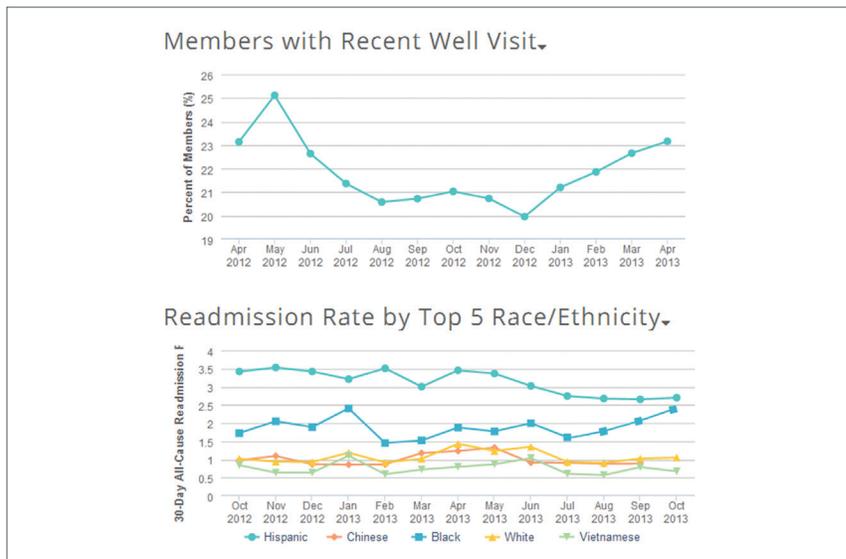

/ HOW DOES IT WORK? /

Aggregates data to identify cost and quality improvement opportunities, leveraging our experience with more than six million Medicaid beneficiaries

Identify and Address Cost Drivers

Analyze data from many sources (claims, membership, provider demographics, and more) to spot cost drivers and drill down to identify potential cost savings.

- Track readmissions, pharmacy expenses, emergency department usage, and more
- Profile physicians, hospitals, and beneficiaries
- Identify top-performing primary care providers
- Stay informed with alerts and automated exceptions

Monitor policy impact on disparities and access to care

Easily Adapt to Growth and Healthcare Reform

Implement ongoing Medicaid management initiatives and adapt to change.

- Review existing policies and set new ones based on data analysis
- Lead data-focused conversations with providers
- Collaborate and share results from within the application

Focus Quality-of-Care Interventions

With a 360-degree view of care, you can evaluate patient care against evidence-based guidelines.

- Identify opportunities for improvement at the population and individual levels
- Analyze disease and case management programs
- Monitor comorbid and chronic conditions

Medicaid Management with a Consultative Touch

You'll benefit from the consultative approach of our experienced performance management team who will tailor the solution to your needs, manage your implementation with ease, and ensure you derive ongoing value from your investment.

MARKET INSIGHT

"Analytics will be invaluable as [healthcare organizations] tackle the surge in Medicaid beneficiaries generated by the Patient Protection and Affordable Care Act. Medicaid is already expensive, with just 5% of beneficiaries accounting for half of total Medicaid spending."

Peter Edelstein, M.D.
Health Management Technology

FOR HEALTH PLANS
